Fulfills following demands: ISO/TC22 N 2072, 74/60/EEC, 78/632/EEC, 95/54/EC, VVFS1994:5

Accessories

STEERING DEVICE
To make the steering easier with only one hand a steering device should be mounted on the steering wheel.

CRUISE CONTROL
If the original vehicle has a cruise control this can be connected to the Carospeed set function for cruise.

ARMREST

UNIVERSAL BRAKE PEDAL COVER
For increased safety a removable brake pedal cover is available. It prevents feet from being trapped under the pedal during drive.

MOUNTING BRACKETS
The mounting bracket for Carospeed is anchored in the front seat bolt holes. Mounting brackets are available either as Vehicle Specific or as Universal.

CAROSPEED

Hand-operated
accelerator
and brake
control

INVENTIONS FOR QUALITY OF LIFE

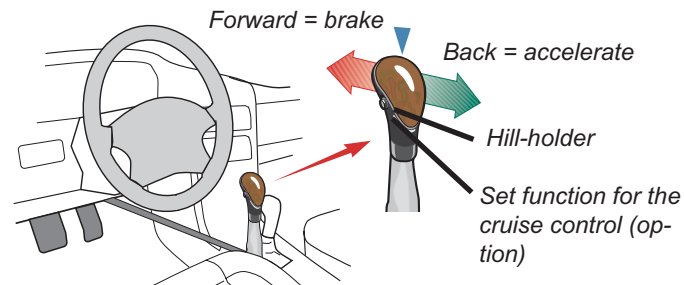

CAROSPEED

- gives you the right feeling when driving!

Right driving feeling

Carospeed is a hand-operated accelerator and brake control for drivers who are unable to use the car pedals. The accelerator and brake functions are transmitted to a lever that is placed beside the driver's seat.

Pull the lever backwards and the vehicle accelerates, brake by pushing the lever forward. It is so simple to handle. Carospeed gives the driver the right feeling when accelerating and braking. The secret lies in the lever's geometry and our long experience in vehicle adaptations.

Hill-holder as standard

The hand control is equipped with a comfortable hill-holder as standard. The hill-holder keeps the vehicle still while the hand moves between gear lever, regulator or hand brake.

Set function for cruise

To avoid keeping the hand on the accelerator when driving far distances, the hand control is prepared for fitting in conjunction with the vehicle's original cruise control.

The set function for the cruise control is activated during driving with the same button as the hill-holder and is disconnected automatically when braking. (The fitting of the set function is an option).

Ergonomic design

Carospeed is an ergonomic designed aid. Many years of experience in designing and manufacturing vehicle adaptations lies behind the development of Carospeed.

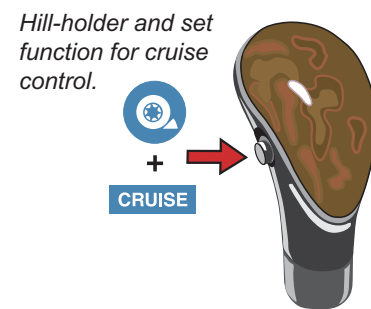

Demands for easy installation and optimal drive feeling has ruled the development. A reference group of disabled drivers has influenced the development and we have had high demands on the hand control design to match vehicle interior equipment.

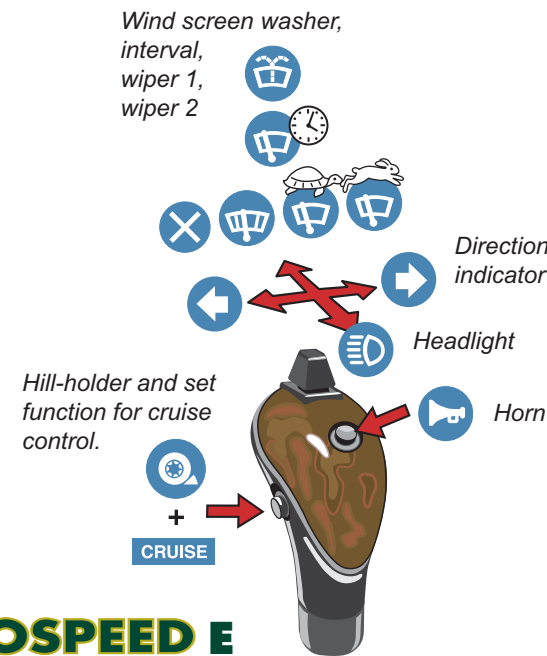

Carospeed is a universal hand control that can be fitted in most vehicles, both right and left hand drive, large and small. Carospeed is fixed to the floor using the drivers seat fixtures and is connected to the ordinary accelerator and brake pedals. The interference is minimal and the vehicle can easily be restored when the time comes to change.

Carospeed is recommended for vehicles with automatic transmission.

CAROSPEED

CAROSPEED E

Black handle and grey cover around the lever bar.

Wood/black handle and grey cover around the lever bar.

T-grip with a soft cylinder shaped design and T-grip in a modelled design with solid surface.

Safety first

Carospeed is CE-marked and meets safety requirements from all major car manufacturers. It is also e-marked within the European community (95/54/EC). Carospeed is accredited in the UK by Motability.

Competent and trained technicians from an Autoadapt authorized workshop must carry out the installation with responsibility for the function and safety.

Carospeed is delivered with detailed installation instructions and a user manual.

CAROSPEED T CAROSPEED TE

Carospeed T (Standard) and TE (Electrical functions) are hand controls with a T-grip. The handle is slightly sloping, which gives the hand a restful and ergonomic position.

Carospeed T and TE are always delivered with a choice of two different handle designs. One design is a soft cylinder shape and the other is a modelled design with solid surface. This way the driver can choose which one he/she feels is the most comfortable.

CAROSPEED INDICATOR

Carospeed Indicator has a switch only for the turn left and the turn right indicator.

Hill holder and set function for cruise are standard. Carospeed Indicator is available with a black coloured handle and a grey cover around the lever bar.

Carospeed Indicator is only available with a black handle.
